

TECHNICAL DATA SHEET

PHOS-PREP® PP T SEAL

Application:

PHOS-PREP® PP T Seal is a mineral fluid base that is used to minimise evaporation of solvents from room temperature paint stripping solutions such as PHOS-PREP® PP 212/ PP 218 - that contain hazardous ingredient for the user and environment.

Instructions for use:

PHOS-PREP® PP T Seal is applied to the surface of the paint stripping solution by pouring slowly from the container taking care not to cause any displacement of the paint stripping solution an depth of 125mm is normally sufficient to seal most surface areas adequately.

We suggest that a lid is kept on the tank solution when not in use, as the paint stripping solution is used drag out of the PHOS-PREP® PP T Seal will occur and we recommend replenishment of the PHOS-PREP® PP T Seal to maintain the minimum depth of 125mm at all times

Control:

As above in instructions for use
